Under Supervision of Prof. Giuseppe Carenini , Prof. Brad Hackinen , and Prof. Francesco Trebbi	
This is joint project with Western University’s Ivey School and University of California Berkeley on regulatory documents.	

Undergraduate research assistant at the University of Tehran

JUL 2022 - MAR 2023

Under Supervision of Prof. [Yadollah Yaghoobzadeh](#) and Dr. [Sascha Rothe](#)

I am working on the influence of data augmentation methods for contrastive-based prompt learning in the RoBERTa language model.

Undergraduate research assistant at the University of Tehran

NOV 2021 - JUN 2022

Under Supervision of Prof. [Azadeh Shakery](#) and Prof. [Yadollah Yaghoobzadeh](#)

I was working on creating pseudo-translation documents for the pre-training stage of a multilingual transformer-based language model. We mapped sentences from one language to another by using bilingual dictionaries with distinct monolingual corpora. The quality of mapped sentences is improved by training a model reordering to enhance the quality of sentences for a language.

Undergraduate research assistant

SEPT 2021 - JUN 2022

Under Supervision of Prof. [Pedram Rooshenas](#)

I developed a VAE-based generative model to simultaneously produce a picture and its caption. We had two goals: 1) Checking the effect of text and image fusion in the latent space on the quality of generative models, and 2) Using the model to create artificial image captioning datasets.

Undergraduate research assistant at the University of Tehran

AUG 2021 - MAR 2023

Under Supervision of Prof. [Behnam Bahrak](#)

I am working in the Data Analytics Lab of the University of Tehran. I have done several projects, including binary sarcasm classification and Persian emotion detection. I recently started a project on detecting people suffering from BPD based on social media data.

Undergraduate research assistant at the University of Tehran

NOV 2020 - SEPT 2021

Under Supervision of Prof. [Hadi Moradi](#)

We developed a cognitive test for preschoolers to determine whether or not they are ready for school. At first, as our system was an AI-powered test-taking system, I was working on the website's back end. After that, for the ASR system in speech-based test, we suggested a new pre-train objective for the Wav2Vec model, and we reached a state-of-the-art model for automatic speech recognition.
