Research Experience

Undergraduate research assistant at the University of Tehran

JUL 2022 - PRESENT

Under Supervision of Prof. Yadollah Yaghoobzadeh and Dr. Sascha Rothe

I am working on the influence of data augmentation methods for contrastive-based prompt learning in the RoBERTa language model.

Undergraduate research assistant at the University of Tehran

NOV 2021 - JUN 2022

Under Supervision of Prof. Azadeh Shakery and Prof. Yadollah Yaghoobzadeh

I was working on a project to use a new pre-train objective for transformer-based language models to reach better results in translation tasks in different scenarios, including zero- and few-shot.

Undergraduate research assistant at the University of Illinois Chicago (UIC)

SEPT 2021 - JUN 2022

Under Supervision of Prof. Pedram Rooshenas

I developed a VAE-based generative model to simultaneously produce a picture and its caption to check the effect of text and image fusion in the latent space of generative models.

Undergraduate research assistant at the University of Tehran
Under Supervision of Prof. Behnam Bahrak

AUG 2021 - PRESENT

I am working in the Data Analytics Lab of the University of Tehran. During this period, I have worked on different projects. For instance, I worked on a binary sarcasm classifier using the sarcasm dataset in SemEval 2022 workshop. We used some new data augmentation ideas to reach better results. In addition, I have two projects undergoing which are going to be completed soon. One of them is Insurance Data Analysis and using LSTMs to decide how should be insured. I also worked on Emotion Detection on the EmoPars dataset from Twitter, and I reached state-of-the-art results on this dataset using ParsBERT.

Undergraduate research assistant at the University of Tehran

NOV 2020 - SEPT 2021

Under Supervision of Prof. Hadi Moradi

We developed a cognitive test for preschoolers to determine whether or not they are ready for school. The test includes a voice recognition model that I have worked on that. Using new pre-train objective provided to famous Wav2Vec model, we reached a state-of-the-art model for automatic speech recognition.
